My Master degree thesis is on Public Perception Tourist Places (A case study of Bhong Masjid Saidabad District Rahim yar khan). In my research project, I worked on the problems of tourists and explained how we can promote any historical place in terms of tourism. And how to take care o f the basic needs of tourists, the conclusion is that the infrastructure of the tourist destination is very unique and the visitors were very happy to see this, but lack of basic facilities, poor transport services where highlighted. Due to these factors the numbers of visitors very less. Generally, the people of the area are illiterate and mostly related to facilitate the tour based activities.
